

# Citation-first evidence for space-biology research

Local-first RAG for 23 approved microgravity and skeletal-muscle publications.

## Who it serves

Researchers, students, educators, and corpus maintainers who need inspectable evidence—not unsupported model recall.

## Core capabilities

Semantic + keyword search; grounded Q&A; passage citations; provenance; evidence sufficiency; study comparison.

## Current status

MVP complete and demo-ready locally. Code, CI, docs, ingestion, retrieval, Ask, citation UI, and evaluations are complete.

## Demo readiness

Docker + indexed PDFs + Ollama/OpenAI support the live app; committed screenshots and presentation materials provide a reliable backup.
